PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Lead with 5+ years of experience designing and delivering scalable enterprise applications, integrations, automation, and cloud-based solutions across healthcare, manufacturing, energy, property, and other business domains. Strong experience in software architecture, API integrations, backend development, Python, JavaScript, automation, AI-enabled solutions, security, data operations, and production support, with deep specialization in the Salesforce ecosystem including Apex, Lightning Web Components, Flow, Experience Cloud, Agentforce, CPQ, and Health Cloud. Experienced in translating complex business requirements into reliable, maintainable technical solutions and leading delivery across international teams and clients in Europe, North America, and Australia. Based in Sweden with the right to work in the Swedish market.

WORK EXPERIENCE

Senior Software Engineer - Salesforce Technical Lead

CodeTerriers | Jun 2024 - Present

- **Technical Leadership:** Lead end-to-end solution designs, translating complex client business requirements into scalable Salesforce architectures for a major Australian enterprise.
- **Core Development:** Architect and maintain advanced programmatic and declarative automation, including Apex triggers, Queueable/Scheduled Apex, complex Flow automations, and custom security frameworks.
- **Integrations & Sites:** Design and deploy robust REST/SOAP API integrations with external networks (Glass Guide, HOUN) while optimizing UI/UX customer journeys on Experience Cloud sites.
- **AI Innovation:** Identify and blueprint high-value Agentforce use cases, seamlessly combining generative AI agents with Flow and Apex to streamline automated customer support workflows.
- **Operations & Compliance:** Spearhead back-office operational improvements, configuring Multi-Factor Authentication (MFA) protocols, email filtering security logic, and custom administrative controls.

Software Engineer - Salesforce

Content Management & Solutions (Pvt) Ltd (CMS) | Jan 2023 - May 2024

- **Enterprise Delivery:** Spearheaded development and administration for European enterprise clients across Field Service, CPQ, and Experience Cloud landscapes.
- **Field Service Optimization:** Implemented Field Service mobile features and customized dispatching workflows, significantly boosting operational efficiency for field technicians.
- **CPQ & Configuration:** Resolved complex CPQ billing issues, optimized functional Flows, and managed end-to-end user access via custom profiles and permission sets.
- **Data Management:** Executed large-scale data migrations, sanitizations, and test-data generation pipelines using technical tools like Workbench and Data Loader.
- **System Integration:** Facilitated secure, real-time data flows by supporting custom API integrations connecting external core ERP systems with the Salesforce platform.

Salesforce Developer - PropTech & Rental (Freelance)

Booking Ninjas / Corporate Rentals Inc | May 2022 - Feb 2026

- **Content Architecture:** Built a fully dynamic, custom Salesforce-powered website enabling non-technical stakeholders to publish custom pages and manage articles purely via declarative layout configuration.
- **Component Engineering:** Developed a highly scalable custom Quote Manager tool and external customer-facing quote pipelines leveraging programmatic Apex and Lightning Web Components (LWC).
- **Omnichannel Integration:** Engineered third-party API configurations connecting Stripe, Calendly, WhatsApp, and Twilio to drive seamless customer scheduling, messaging, and digital payment collections.
- **Portal Deployment:** Built and supported secure high-traffic Support and Client Portals utilizing Experience Cloud, Salesforce Sites, and automated REST system integrations.

Salesforce Developer - Enterprise Consulting

Virtusa Pvt Ltd | Nov 2020 - Dec 2022

- **Health Cloud Customization:** Designed customized healthcare workflows, administrative console configurations, and custom automation scripts using Salesforce Health Cloud.
- **Backend Automation:** Programmed performant Apex triggers, scheduled batch jobs, and Queueable background logic to ensure scalable execution under high data loads.
- **Platform Security:** Formulated data structures by building custom objects, schema fields, flexible page layouts, and fine-tuning field-level security access controls.
- **Consulting & Release:** Provided technical production support, addressed bugs in test and production environments, and executed software deployments across complex sandbox pipelines.

SKILLS

- **Development & Architecture:** Python, JavaScript, Apex, SOQL, SOSL, Lightning Web Components (LWC), Apex Triggers, Queueable & Scheduled Apex, Async Apex, Object-Oriented Programming (OOP), asynchronous processing, bulkification, governor limit optimization, backend development, solution architecture
- **Salesforce Platform & Clouds:** Experience Cloud, Service Cloud, Field Service (FSL), CPQ (Steelbrick), Health Cloud, Salesforce Sites, platform configuration, Custom Metadata Types, data modeling
- **Automation & AI:** Flow Builder (Screen, Record-Triggered, Schedule-Triggered), Agentforce, AI agents, prompt engineering, Einstein AI, LLM integrations, workflow automation, validation rules, approval processes, complex business logic
- **Integration & Backend:** REST APIs, SOAP APIs, Custom Web Services, Python-based integrations and services, webhooks, JSON, OAuth, ERP integrations, Stripe, Twilio, Calendly, WhatsApp
- **Data Management:** Workbench, Data Loader, large-scale data migration, data transformation, data sanitization, data modeling
- **Security & Governance:** Profiles, Permission Sets, Permission Set Groups, Sharing Rules, Organization-Wide Defaults (OWD), Field-Level Security (FLS), MFA configuration, enterprise security and access management
- **Delivery & DevOps:** Technical leadership, Agile/Scrum delivery, stakeholder collaboration, technical debt mitigation, CI/CD pipelines, GitHub Actions, SFDX CLI, Git version control, unit testing, debugging, code review, production support

EDUCATION & CERTIFICATIONS

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT) | 2021

Salesforce Platform Certifications

- **Salesforce Certified AI Associate** – Issued Jan 2025
- **Salesforce Certified Platform App Builder** – Issued Mar 2023
- **Salesforce Certified Administrator (SCA)** – Issued Feb 2022
- **Salesforce Certified Platform Developer I** – Issued Nov 2021

Software Engineering & Architecture Certifications

- **Data Mesh Architecture: Core Concepts** – Issued Sep 2026
- **Hands-On AI: Introduction to Retrieval-Augmented Generation (RAG)** – Issued Sep 2026
- **Software Design: From Requirements to Release** – Issued Sep 2026
- **Web Components and Modularization: Practical Approaches** – Issued Sep 2026
- **Python Code Challenges for Object-Oriented Programming** – Issued Sep 2026

DevOps & Systems Engineering

- **GitHub Actions for CI/CD: Build, Test, and Deploy** – Issued Sep 2026
- **IFS Applications 10 Essentials for Consultants (ERP)** – Issued Feb 2020

Professional Development

- **How to Speak Smarter When Put on the Spot** – Issued Sep 2026

Languages

- **English** (Professional Working Proficiency)
- **Sinhala** (Native/Bilingual Proficiency)
